Periodontal Disease Surveillance Workgroup Meeting I- Atlanta, GA

General Information

Workshop Title: Periodontal Disease Surveillance Workgroup Meeting I

Purpose of Workshop: This workgroup was first convened in April 2003, to address the feasibility of developing self-report measures for periodontal disease and evaluate the current examination protocol used in NHANES for the periodontal examination. Since this time the workgroup has workgroup on a number projects related to this project, including special supplements, pilots using NHANES Mobile Examination Centers, and symposia. This meeting will serve to present the findings from the pilot of the self-report questions and full mouth periodontal examination using NHANES.

Benefit of Workshop to CDC: The benefit to CDC will include use of these questions, not only in NHANES but the BRFSS survey. CDC/DOH serves as the lead on surveillance issues related to oral health.
